About Company

### What do we Offer

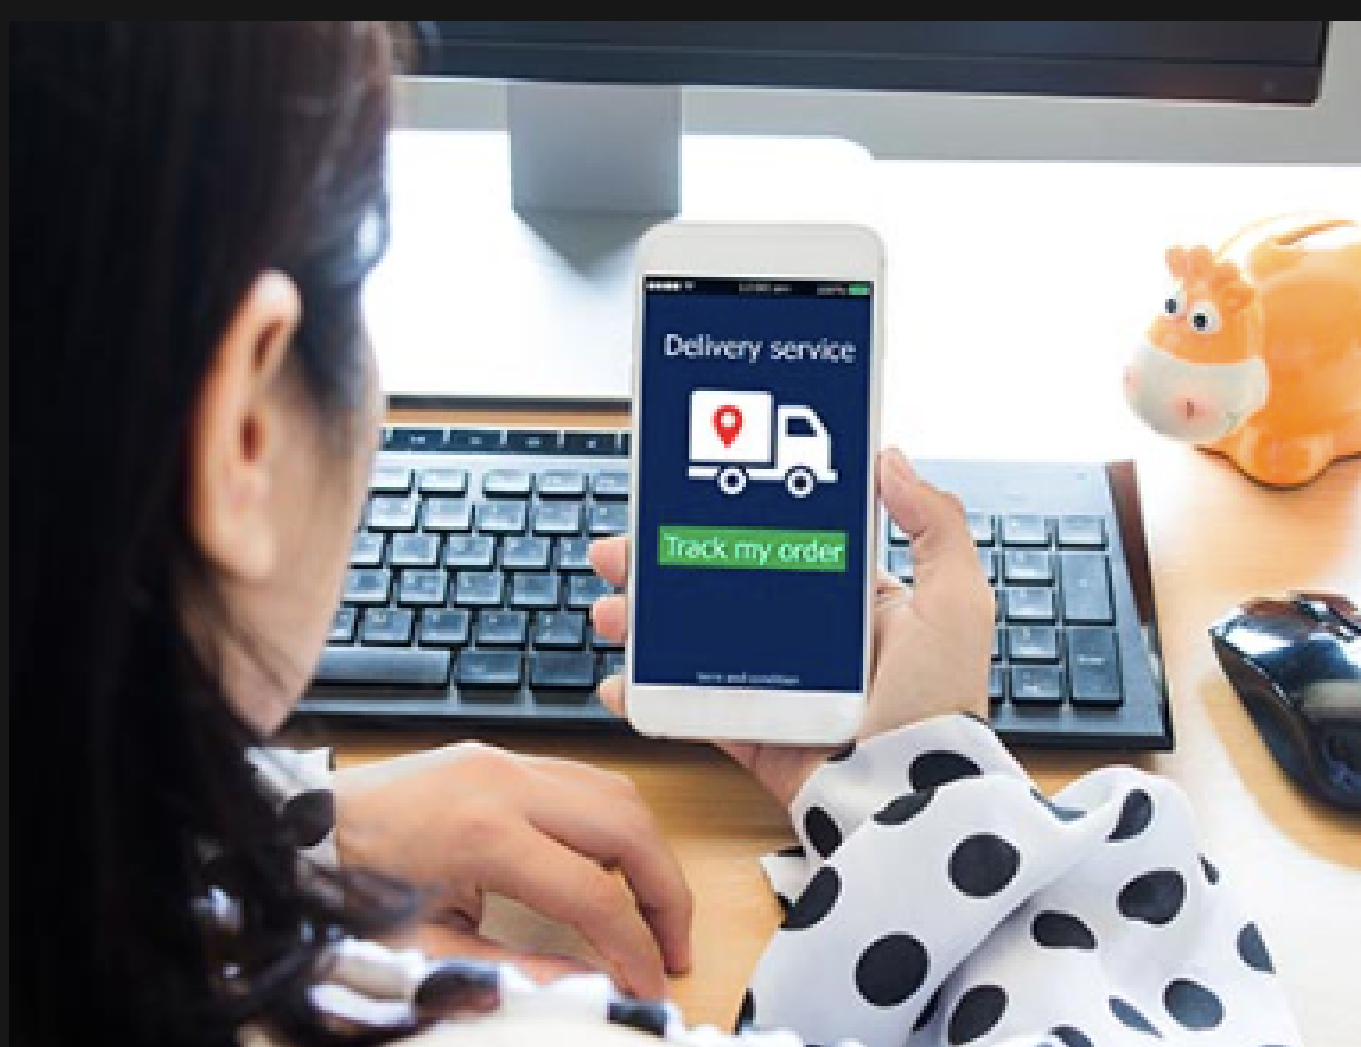

We are here to present the idea as the solution to all above mentioned problems. We have a device that gives all the required information like location, imagination, live location, car health, engine oil change, fuel average and fuel present in the car, mileage etc. yet there is no integrated app present for the system that a common person or governmental department can use these all features. We are going to develop the app and website. Those will bring ease to the user end. Through this system, governmental departments can monitor the movement of their fleet that will provide some extra security and also check the habits of the driver how he is driving, rash driving or over speeding etc.

 Certified Company

## People Say The Nicest Things

Hashtrackers provides excellent services; my vehicle got stolen near Raiwind, Alhamdulillah it recovered with the help of their recovery team within 2 hours... Thumps up and Keep it up...
